

**TECHNICAL UNIVERSITY OF CRETE**  
**SCHOOL OF ENVIRONMENTAL ENGINEERING**  
**ENVIRONMENTAL HYDRAULICS & GEOENVIRONMENTAL ENGINEERING DIVISION**  
**COMPUTATIONAL DYNAMICS & ENERGY (CODEN) RESEARCH GROUP**  
**HEAD: PROFESSOR YIANNIS TSOMPANAKIS**

**Short CV**

**Yiannis Tsompanakis**

Dr Yiannis Tsompanakis is a civil engineer specialized in computational dynamic methods in engineering. He is Professor in the School of Environmental Engineering of the Technical University of Crete, Greece, and Head of Computational Dynamics & Energy (CODEN) Research Group. He teaches undergraduate & postgraduate courses and has supervised PhD, MSc and Diploma theses. He is expert in development and application of advanced simulation techniques and computational methods for structures and infrastructures. His research and engineering interests and expertise include structural and geotechnical earthquake engineering, geoenvironmental engineering, soil-structure interaction, structural optimization, probabilistic mechanics, structural integrity assessment & monitoring, life-cycle analysis & performance-based design, and artificial intelligence methods. As an internationally recognized researcher he has published more than 250 publications (journal papers, international conference papers, book chapters, edited books and conference proceedings). He has also prepared special issues in journals and organized several conferences, special sessions and mini-symposia. He is reviewer in many archival scientific engineering journals. Dr Tsompanakis has excellent leadership, interpersonal and negotiating skills and many international cooperations with other scientific groups and engineering firms in Greece and abroad (USA, UK, Italy, Germany, France, Serbia, etc). He is highly skilled in implementation and management of quantitative/qualitative state-of-the-art research. He has significant practical and scientific experience from his participation in many national and international projects, working either with his group or jointly with other collaborating teams. He is Secretary of Technical Committee TC4: Life-cycle performance, cost and optimization της International Association for Structural Safety and Reliability (IASSAR). He is Organizer of the International Conference Series on Soft Computing Technology in Civil, Structural and Environmental Engineering. Moreover, he is Technical Editor of the Structure and Infrastructure Engineering Journal (Taylor & Francis Publ.).

CODEN Research Group consists of several under-graduate and post-graduate students and post-doc research associates. The scientific expertise of the CODEN Research Group focuses mainly in the broad area of Computational Dynamics. Main research and scientific fields with strong know-how of CODEN are related with this area. In particular, innovative computational tools and methodologies are developed and applied for the analysis and design of structures and infrastructures under static or dynamic/seismic loading. CODEN group main expertise is the development and application of advanced simulation techniques and computational methods for structures and infrastructures (buildings, geostructures, lifelines, etc).

Research interests of CODEN group include structural and geotechnical earthquake engineering, soil-structure interaction, structural optimization, probabilistic mechanics, structural integrity assessment & monitoring, mitigation of geohazards, life-cycle analysis & performance-based design, artificial intelligence methods in engineering, etc. CODEN group cooperates with other scientific groups in Greece and other countries and has participated in national and international projects. CODEN group has given particular emphasis on various engineering problems related to geohazards for structures and energy infrastructure, aiming to assist in the protection of the environment, population and energy infrastructures (transportation networks, pipelines, plants, tanks, etc) from natural and man-made disasters. Indicative research fields: a) design of onshore and offshore gas pipelines against geohazards (active faults, landslides, soil liquefaction, etc), b) seismic design of liquid fuel tanks and storage terminals, c) onshore and offshore wind turbine design with emphasis on dynamic soil-structure interaction, d) seismic vulnerability of dams, waste landfills, tailings dams, etc.

### Academic Position

Professor of Structural & Earthquake Engineering, Head of Computational Dynamics & Energy (CODEN) Research Group, School of Environmental Engineering, Technical University of Crete (TUC), Greece.

### Contact Data

Professor Yiannis Tsompanakis  
School of Chemical and Environmental Engineering  
Technical University of Crete  
Sciences Building - Office 141.B.86  
University Campus  
Chania, 73100  
Crete, Greece  
Tel/Fax: 0030-28210-37634/37846  
Email: [jt@science.tuc.gr](mailto:jt@science.tuc.gr)

### Education

- Diploma of Civil Engineering, National Technical Univ. of Athens (NTUA), Greece.
- Ph.D. in Computational Mechanics: Large-scale structural optimization using serial and parallel computations, School of Civil Engineering, National Technical University of Athens, Greece.

### Professional/Scientific Experience

- Academic: teaching, lecture notes and e-notes, laboratory exercises and project preparation.
- Translation of scientific books (e.g., "Vector Mechanics for Engineers, Statics", by: Beer F.R., Johnston, R., Eisenberg E.R. and Staab G.H)
- Lecturing in seminars for civil engineers of the public sector in advanced computational topics in earthquake engineering (Athens, 2008).
- Participation in research projects.
- Preparation of research proposals.
- Participation in conferences and seminars
- Organization of scientific meetings and conferences.
- Design and construction of structures as a civil engineer since 1992.
- Consulting for engineering firms.
- Field trip experience from the post-earthquake visit in L'Aquila (2009) in Italy, in cooperation with Technical Univ. of Bari and the Organization of Earthquake Protection of Italy.

### Teaching

- Postgraduate lessons in TUC: "Dynamics of Structures", "Computational Mechanics", "Computational Dynamics", "Advanced Topics in Structural Earthquake Engineering", "Geotechnical & geoenvironmental engineering and earthquake related geohazards".
- Undergraduate lessons in TUC: "Mechanics of Structures", "Introduction to Earthquake Engineering and Engineering Seismology", "Introduction to Finite Element for Structural Analysis", "Design of Reinforced Concrete Structures".
- Undergraduate lessons in Technological Institute of Crete (2000-2003).

### Supervising

- Supervisor of four completed PhD and two PhD in TUC that are under development, three of which are funded by two research projects. Furthermore, he was member of the examining committee of PhDs in TUC and participated in another one at the School of Civil Eng. of NTUA, Greece. He has been external examiner in two completed PhD and in one more PhD that is under development in Technical Univ. of Bari, Italy.
- He has supervised several Master theses in TUC, one of which was funded by a research project. One more Master is under development. Also, he has been a member of the examining committee for Masters in other Departments of TUC.
- He has supervised several Diploma theses of his undergraduate students from the Environmental Engineering Department of TUC. One more Diploma theses is under development and he has been member of the examining committee of several more Diploma thesis.
- He has supervised many technical project reports of postgraduate students in Mechanics Division of TUC.

### Refereeing & Editing

- Reviewing of papers for scientific journals and conferences.
- Referee of research proposals.
- Referee of scientific book and journal proposals.
- Experience from editing papers for special sessions, minisymposia and conferences.
- Editorial experience from editing journal special issues and preparing scientific volumes.
- Editorial experience from handling journal Structure and Infrastructure Engineering Journal (Taylor&Francis Publ) as Technical Editor.

### Memberships

- Technical Chambers of Greece.
- Greek Civil Engineers' Association.
- Greek Association of Computational Mechanics - GRACM.

- Greek Earthquake Engineering Association.
- International Society of Structural and Multidisciplinary Optimization-ISSMO.
- International Association of Life-Cycle Civil Engineering - IALCCE.
- International Association for Bridge Maintenance and Safety - IABMAS.
- European Association for Structural Dynamics - EASD.
- International Association for Structural Safety and Reliability-IASSAR.
- Secretary of T4 Technical Committee IASSAR: on Life-Cycle Performance, Cost and Optimization.

### Recent Research Projects

- TEMPUS EU Programme 543898-TEMPUS-1-2013-1-ES-TEMPUS-JPHES, “WIMB: Development of Sustainable Interrelations between Education, Research and Innovation at WBC Universities in Nanotechnologies and Advanced Materials where Innovation Means Business”, 2013-2017.
- Research Program THALIS, “Wireless Admittance-based structural health Monitoring System-WiAMS”, Co-funded by Greek General Secretary of Research and Technology and European Union, 2012-2015.
- Research Program Hrakleitos “Advanced seismic design methods for geosynthetically reinforced embankments”, Co-funded by Greek General Secretary of Research and Technology and European Union, 2010-2015.
- Greek Ministry of Development-General Secretariat of Research and Technology Research Coupon grant 54640909-05-000070 “Numerical investigation of an elastic foundation method for buildings, 2010-2011.
- TEMPUS EU Programme, “Curricula Development Project JEP-CD-40104-2005: Engineering Business Management and Services Master Module”, 2006-2009.
- Research Program PENED 2003-03ED-454 “Seismic response of waste landfills”, Co-funded by Greek General Secretary of Research and Technology and European Union, 2005-2010.

- Psarropoulos P.N., Tsompanakis Y., Katsirakis M. Dynamic soil-structure interaction between retaining walls, retaining soil and retained structures. Invited paper for Special Issue: “Modelling and Assessment of Soil-Structure Interaction Effects on the Dynamics of Structures”, *Bulletin of Earthquake Engineering*, 2022, <https://doi.org/10.1007/s10518-021-01288-6>.
- Tsiplanitis, A., and Tsompanakis, Y. Improving the seismic performance of base-isolated liquid storage tanks with supplemental dampers. *Earthquake Engineering and Engineering Vibration*, 21(1), 1-14, 2022.

#### VI. Invited talks in International Conferences & Seminars

- Tsompanakis Y., Open issues in dynamic interaction of retaining walls and retained soil and structures, *Advanced Research Workshop on Coupled site and soil-structure interaction effects with application to seismic risk mitigation*, Borovets, Bulgaria, 30 August-3 September 2008.
- Tsompanakis Y., Issues related to seismic response of geosynthetically reinforced soil structures, in *ECT-2010: The 7th International Conference on Engineering Computational Technology*, Valencia, Spain, 14-17 September, 2010.
- Tsompanakis Y., Towards a realistic consideration of Dynamic Soil-Structure Interaction in urban environments (retaining walls & retained structures), *14th Italian Congress of Earthquake Engineering, XIV CONVEGNO ANIDIS - L'Ingegneria Sismica in Italia (ANIDIS2011)*, Bari, 18-22 Sept 2011.
- Tsompanakis Y., Local site conditions and dynamic soil-structure interaction in Eurocode 8, *External Experts Lecture Series, Department of Civil & Environmental Engineering, University of Cyprus, Nicosia, March, 2012*.
- Tsompanakis Y. & Psarropoulos P.N., Dynamic Soil-Structure Interaction: Reality versus Seismic Norms, in *ECT-2012: The 8th International Conference on Engineering Computational Technology*, Dubrovnic, Croatia, 4-7 September, 2012.
- Y. Tsompanakis, I. Tzavara, V. Zania, P.N. Psarropoulos, Impact of fault rupture on reinforced earth structures, *COMPDYN 2015 – 5th International Conference on Computational Methods in Structural Dynamics and Earthquake Engineering*, Heraklion, Greece, 25-27 May, 2015.
- Y. Tsompanakis, A. Tsiplanitis, Dynamic soil-structure interaction effects on liquid storage tanks, *COMPDYN 2019 – 7th International Conference on Computational Methods in Structural Dynamics and Earthquake Engineering*, Heraklion, Greece, 24-26 June, 2019.
- Y. Tsompanakis, D. Chatzidakis, P.N. Psarropoulos, N. Makrakis. Offshore geohazards threatening high-pressure gas pipelines. *Workshop of Exchange-Risk: Experimental & Computational Hybrid Assessment of Natural Gas Pipelines Exposed to Seismic Risk*. University of Bristol, Bristol, UK, December 17-18, 2019.

## VII. International Conferences Papers

- Y. Tsompanakis and N.D. Lagaros, Seismic vulnerability assessment of embankments, Icosar09: 10th International Conference on Structural Safety and Reliability, Osaka, Japan, 13-17 September, 2009.
- P.N. Psarropoulos, V. Drosos, Y. Tsompanakis, “Soil–foundation–structure interaction of wind turbine towers on monopoles”, ECT2010: The 7th International Conference on Engineering Computational Technology, Valencia, 14-17 September, 2010.
- Y. Tsompanakis, P.N. Psarropoulos, V. Drosos, Low-cost seismic base isolation using recycled tire cushions, CC 2011: The 13th International Conference on Civil, Structural and Environmental Engineering Computing, Chania, Greece, 6-9 September 2011.
- V. Zania, Y. Tsompanakis, P.N. Psarropoulos and G. Bouckovalas, Impact of geosynthetics on reducing permanent deformations on soil embankments, XV European Conference on Soil Mechanics & Geotechnical Engineering (ECSMGE-2011), Athens, September 12-15, 2011.
- I. Tzavara, Y. Tsompanakis, V. Zania, P.N. Psarropoulos, A comparison of analytical approaches for the assessment of seismic displacements of geosynthetically reinforced geostructures, 15WCEE: The 15th World Conference on Earthquake Engineering, Lisbon, Portugal, 24-28 September 2012.
- C. Providakis, K. Stefanaki, M. Voutetaki, Y. Tsompanakis, M. Stavroulaki, Developing a multi-mode PZT sensing solution for active SHM in concrete structures, IEEE Sensors Applications Symposium (SAS2013), Galveston, Texas, USA, February 19-21, 2013.
- Lagiou M. and Tsompanakis Y., Seismic retrofitting of existing RC structures using FRP, in 10th HSTAM Congress on Mechanics Proceedings, Chania, Crete, Greece, May 25-27, 2013.
- E. Nitadorakis, Y. Tsompanakis and N.D. Lagaros, Performance assessment of seismically isolated reinforced concrete frames, in Proceedings of Icosar13: The 11th International Conference on Structural Safety and Reliability, New York, USA, 16-20 June, 2013.
- C. Providakis, K. Stefanaki, M. Voutetaki, Y. Tsompanakis, M. Stavroulaki, J. Agadakos, An integrated approach for structural health monitoring of concrete structures based on electromechanical admittance and guided waves, 6th ECCOMAS Thematic Conference on Smart Structures and Materials, Torino, Italy, June 24-26, 2013.
- C. Providakis, K. Stefanaki, T. Triantafyllou, M. Voutetaki, Y. Tsompanakis, M. Stavroulaki, D. Karabalis and C. Papanicolaou, An innovative structural health monitoring technique for concrete structures based on the combination of admittance and guided wave methodologies, in Proceedings of 6th World Conference on Structural Control and Monitoring (6WCSCM), Barcelona, Spain, July 15-17, 2014.
- A. Andreadakis and Y. Tsompanakis, Combined effects of infill walls and steel bracings in seismic response of RC buildings, in Proceedings of 2nd European Conference on Earthquake Engineering and Seismology (2ECEES), Istanbul, Turkey, August 24-29, 2014.
- I. Tzavara, Y. Tsompanakis, V. Zania, P.N. Psarropoulos, Coupled and decoupled approaches for seismic stability assessment of reinforced earth structures, in Proceedings of 2nd European Conference on Earthquake Engineering and Seismology (2ECEES), Istanbul, August 24-29, 2014.
- P.N. Psarropoulos, A.A. Antoniou and Y. Tsompanakis, Earthquake-related geohazards and seismic design of pipelines, in Proceedings of 2nd European Conference on Earthquake Engineering and Seismology (2ECEES), Istanbul, Turkey, August 24-29, 2014.
- I. Tzavara, Y. Tsompanakis, V. Zania, P.N. Psarropoulos, Dynamic sliding of geosynthetically reinforced slopes, in Proceedings of 12th International Conference on Computational Structures Technology (CST2014), Naples, Italy 2-5 September 2014.
- A.A. Antoniou, P.N. Psarropoulos, Y. Tsompanakis, Assessment and treatment of earthquake-related geohazards threatening offshore gas pipelines in the Mediterranean sea. 10th International Pipeline Technology Conference (PTC-2015), Berlin, Germany, 8-10 June 2015.
- Providakis C., Tsistrakis S., Voutetaki M., Tsompanakis Y., Stavroulaki M., Agadakos J., Kampianakis E. and Pentes G. A wireless structural monitoring system for damage detection in concrete structures based on an electromechanical impedance-type approach. 16th International European Bridge Conference and Exhibition, Edinburgh, 23-25 June 2015.

- D. Chatzidakis, Y. Tsompanakis, P.N. Psarropoulos, Efficient earthquake resistant design of natural gas pipelines subjected to large kinematic distress, CC 2015: The 15th International Conference on Civil, Structural and Environmental Engineering Computing, Prague, Czech Republic, 1-4 September 2015.
- D. Chatzidakis, Y. Tsompanakis, P.N. Psarropoulos, Offshore natural gas pipelines subjected to kinematic distress, COMPDYN 2017 – 6th International Conference on Computational Methods in Structural Dynamics and Earthquake Engineering, Rhodes Island, Greece, 15-17 June 2017.
- A. Tsipianitis, and Y. Tsompanakis, Seismic vulnerability assessment of base-isolated liquid fuels tanks, Icosar17: The 12th International Conference on Structural Safety and Reliability, Vienna, Austria, 6-10 August, 2017.
